About IRENA

The International Renewable Energy Agency (IRENA) serves as the principal platform for international co-operation, a centre of excellence, a repository of policy, technology, resource and financial knowledge, and a driver of action on the ground to advance the transformation of the global energy system. An intergovernmental organisation established in 2011, IRENA promotes the widespread adoption and sustainable use of all forms of renewable energy, including bioenergy, geothermal, hydropower, ocean, solar and wind energy, in the pursuit of sustainable development, energy access, energy security and low-carbon economic growth and prosperity. www.irena.org

Acknowledgements

IRENA is grateful for the Italian Ministry of Foreign Affairs and International Cooperation (Directorate-General for Global Affairs, DGMO) contribution that enabled the preparation of this report in the context of the Italian G20 Presidency.

This report was prepared under the guidance of Francisco Boshell and developed by Elena Ocenic, Mustafa Abunofal and Remi Cerdan.

The report has benefitted from the input of the G20 Working Groups on Energy Transition and Climate Sustainability, the IRENA Collaborative Framework on Ocean Energy/Offshore Renewables and various experts, notably from: Nicola Bazzani (Italian Ministry of Foreign Affairs and International Cooperation), Andrea Lo Presti (Ministry of Ecological Transition), Rémi Collombet (Ocean Energy Europe), Joyce Lee (Global Wind Energy Council), Elisa Obermann (Marine Renewable Canada), and Hidenori Yonekura (NEDO)

IRENA colleagues who provided valuable review and support include: Dolf Gielen, Roland Roesch, Herib Blanco, Gabriel Castellanos, Gayathri Nair.

The G20 is well placed to foster offshore renewables deployment worldwide. Its members account for the vast majority of global economic activity and trade and are home to over three-quarters of total renewable installed capacity. In 2020, 99.3% of total offshore wind capacity and nearly all installed ocean energy capacity globally was found in G20 countries

CONTENTS

- Figures 4
- Tables 4
- Boxes 4
- Abbreviations 10

- Highlights 12
 - Market status and outlook 13
 - Emerging technological trends 16
 - Contributions to the blue economy and the energy transition 22
 - Recommendations to the G20 23
 - G20 action agenda 26

- 01 INTRODUCTION. 28**
 - Key drivers of offshore renewable development 29
 - Key challenges of offshore renewable commercialisation 29
 - The role of the G20 and IRENA 30
 - Objectives and structure of the report 31

- 02 Offshore wind. 32**
 - Technology status and outlook 33
 - Market status and outlook 40
 - Competitiveness 46
 - Emerging trends for offshore wind 47
 - Offshore wind and green hydrogen 50

- 03 Ocean Energy 52**
 - Technology status and outlook 53
 - Market status and outlook 59
 - Competitiveness 63
 - Emerging trends for ocean energy 64
